

Junior Web Developer

Virsaе is a fast-growing global SaaS business, headquartered in Auckland with offices in the US and UK. Our cloud-native business communications management platform, Virsaе Service Management, is leading the way in delivering peak performance for UC and contact center environments.

We're a company that provides top-quality services to our customers while fostering a positive and supportive work environment for our team members. We believe that by putting our people first, we can achieve great things together.

We are now seeking a Junior Web Developer to join our team. We offer competitive remuneration and flexible work hours, including the option to work from home for a healthy work-life balance.

If you are passionate about web development, have experience with Angular Framework, .Net, and Git, and thrive in a fast-paced environment, we encourage you to apply for this exciting opportunity. Contact: recruitment@virsaе.com

The Role

As a Junior Web Developer within our development team based in Auckland you will be responsible for developing and maintaining web applications, as well as ensuring the highest level of code quality and application performance.

Responsibilities

- Collaborate with the development team to design, develop, and maintain web applications using Angular Framework and .Net
- Write clean, maintainable and efficient code that adheres to coding standards and best practice
- Ensure the highest level of application performance, stability, and security
- Participate in code reviews to maintain code quality and identify opportunities for optimization
- Utilize Git for version control and participate in continuous integration and continuous delivery (CI/CD) processes
- Troubleshoot and resolve technical issues that arise in development, testing, and production environments
- Stay up to date with emerging trends and technologies in web development, and provide recommendations for improvements to existing applications

Experience

- Bachelor's Degree in Computer Science, Computer Engineering, or related field
- Experience with Angular Framework, .Net, and Git
- Strong knowledge of HTML, CSS, and JavaScript
- Familiarity with front-end development tools such as webpack or npm
- Experience with database design and SQL
- Strong problem-solving and analytical skills

- Ability to work collaboratively in a team environment
- Excellent written and verbal communication skills
- Strong attention to detail

We pride ourselves on being a great place to work. If you're ready to fast forward your career then send your resume through to recruitment@virsaе.com.
